

## Installation Guide

### Front Lower Performance Bar ND

ND0-0963

04.2017

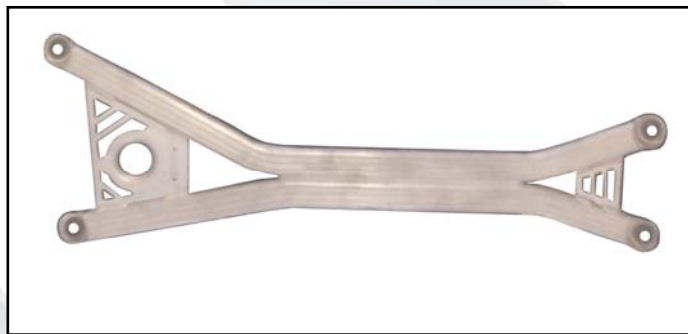

pic 1

To install the performance bar please loosen and remove screws 1 till 9 and clip 10, now you can remove the OEM / original bar. (pic1)

Mount the lower performance bar (pic 2) with the OEM / original screws on mounting points 1 till 4 .

Fixate the front cover with clip number 10 to the performance bar, now you can mount the covers (front and rear) with the OEM / original screws and supplied nuts on mounting points 5 till 9.

pic 2

Please check tightness / fitment of the performance brace after torquing the screws to the below values

#### torque values and mounting points

1 → 17,7 - 26,5 Nm	6 → 6 - 10 Nm
2 → 17,7 - 26,5 Nm	7 → 6 - 10 Nm
3 → 17,7 - 26,5 Nm	8 → 6 - 10 Nm
4 → 17,7 - 26,5 Nm	9 → 6 - 10 Nm
5 → 6 - 10 Nm	10 → Clip
